

In order to learn which questions have been answered correctly:

1. Print these pages.
2. Answer the questions.
3. Send this assessment with the answers via:
 - a. FAX to (212) 967-3498.

Or

- b. Mail the answers to the following address:

**SYS-ED
PO Box 1213
New York, NY 10156**

Client contact:

QNO	Question	Answer
1.	<p>Which component is required for Active Directory to function properly?</p> <ul style="list-style-type: none"> a. DHCP b. IPSec c. WINS d. DNS 	
2.	<p>Which should be placed on separate hard disks to improve Active Directory performance?</p> <ul style="list-style-type: none"> a. Active Directory schema b. Database and database logs c. SYSVOL folder d. DNS zone files 	
3.	<p>All of the following are possible options when installing Active Directory except:</p> <ul style="list-style-type: none"> a. Adding an additional domain controller b. Adding a new domain tree to an existing forest c. Specifying a global catalog server d. Adding a new domain to an existing domain tree 	
4.	<p>Which of the following tools would be used to switch a domain from mixed mode to native mode?</p> <ul style="list-style-type: none"> a. Active Directory Schema snap-in b. Active Directory Users and Computers console c. Active Directory Sites and Services console d. Active Directory Domains and Trusts console 	
5.	<p>Which console is used to configure replication parameters for Active Directory?</p> <ul style="list-style-type: none"> a. Active Directory Schema snap-in b. Active Directory Domains and Trusts console c. Active Directory Sites and Services console d. Active Directory Users and Computers console 	
6.	<p>Which tool is used to access the Active Directory schema?</p> <ul style="list-style-type: none"> a. Active Directory Sites and Services console b. MMC c. Schmmgmt.dll d. Schmmgmt.exe 	
7.	<p>How many servers can hold the schema master role in a forest?</p> <ul style="list-style-type: none"> a. 1 b. 10 c. 8 d. 2 	
8.	<p>If the server holding the _____ role is offline, it will not be possible to create new objects in Active Directory.</p> <ul style="list-style-type: none"> a. domain-naming master b. RID master c. infrastructure master d. PDC emulator 	

QNO	Question	Answer
9.	<p>Which operations master role is responsible for processing password changes from down-level clients?</p> <p>a. PDC emulator b. Infrastructure master c. RID master d. Domain naming master</p>	
10.	<p>How a domain controller, whose roles have been seized, be restored?</p> <p>a. Use NTDSUtil to seize the roles from the server currently holding the role b. Restore from a backup, which has a backup of the system state c. Format the disk and reload Windows Server d. Retransfer the roles back to the server</p>	
11.	<p>New domains cannot be added when the domain naming master is inaccessible.</p> <p>a. TRUE b. FALSE</p>	
12.	<p>The NTDSUTIL utility can be used to transfer operations master roles.</p> <p>a. TRUE b. FALSE</p>	
13.	<p>OUs simplify the administration when there are a large number of objects in Active Directory.</p> <p>a. TRUE b. FALSE</p>	
14.	<p>The PDC emulator role is used to process password requests from Windows Server 2003 clients.</p> <p>a. TRUE b. FALSE</p>	
15.	<p>The MMC must be used to add the snap-in for the Active Directory schema.</p> <p>a. TRUE b. FALSE</p>	
16.	<p>Which of the following are used to control issues related to physical location?</p> <p>a. sites b. forests c. domains d. trees</p>	
17.	<p>Which components allow the Active Directory domain structure to be extensible?</p> <p>a. Active Directory schema b. Active Directory configuration partition c. Group policies d. LDAP</p>	

QNO	Question	Answer
18.	<p>Which component is used to exchange information between the directory service and requesting applications?</p> <p>a. LDAP b. HTTP c. ADSI d. NSPI</p>	
19.	<p>Which component acts as an interface between the software layers and core hardware?</p> <p>a. HAL b. Kernel mode drivers c. Executive d. Microkernel</p>	
20.	<p>The Win32 API is a part of the _____ subsystem.</p> <p>a. Win32 subsystem b. Integral subsystem c. Environment subsystem d. POSIX subsystem</p>	
21.	<p>Which component of the Active Directory architecture is in direct contact with the data store using the object's RDN?</p> <p>a. ESE b. DSA c. NTDS.DIT file d. Database layer</p>	
22.	<p>In an OU, two objects cannot have the same _____.</p> <p>a. CN b. DN c. RDN d. GUID</p>	
23.	<p>Which component of the Active Directory naming convention is used to identify the domain to which the user belongs?</p> <p>a. UPN b. DN c. RDN d. GUID</p>	
24.	<p>Which of components are not common to all domains in a forest?</p> <p>a. Configuration b. Schema c. DNS domain name d. Global catalog</p>	

QNO	Question	Answer
25.	In a domain tree, what type of trust relationship exists between the root domain and the participating child domains? a. Two-way transitive b. One-way transitive c. One-way, non-transitive d. Two-way, non-transitive	
26.	Every domain in a tree follows a contiguous naming scheme. a. TRUE b. FALSE	
27.	Sites are part of the physical Active Directory structure. a. TRUE b. FALSE	
28.	Site objects are independent of subnet objects in Active Directory. a. TRUE b. FALSE	
29.	By default, the last domain controller in the forest is designated as the global catalog server. a. TRUE b. FALSE	
30.	Storage of universal groups in a forest is one function of a global catalog server. a. TRUE b. FALSE
