Subject:	Training Info - Courseware

Hi David,

I am a technical trainer located in Ohio and am looking for a courseware source for some custom developed material and also some standard class materials. . My first set of classes is for the state of LA. I am delivering a set of DB2 classes. Could you let me know what DB2 courseware you have for licensing? I also lead several java and Oracle bootcamps every year. Please send me your list of available courseware/costs in those areas.

Thank You

Stuart R. Goldlust
