Mr. Shapiro,

I had already viewed this link below you provided, and was viewing the MVS/JCL Table of Contents, along with reading through Chapter 1 and 2 (provided through your website). I am hoping that you may have a CD-ROM, or possibly a virtual (recorded) copy of this course for the public. Would you possibly have the remainder of the chapters available for the public as well. I would not be able to attend a course in New York City, but am eager to get JCL training as soon as possible. Are there other options you would recommend to acquire the performance objectives of the MVS/JCL course as listed?
