Subject:	DYL-280 Letter files

Hi Jonathan,

Thank you so much for following through on the problem and for your analysis. Yes, I agree that DYL-280 has some short comings there and we will just have to work around it. Hope everything finds you well and that you missed having to evacuate Houston along with another 2 million good folks.

I enjoyed the DYL-280 class and hope to see you again in the future.

Pete Lopez

Subject: DYL-280 Letter files

Pete,

I have trawled through my Vision:Results (DYL-280) material to try to find a way to read in your Letter file.

I've summarized my findings in the enclosed attachment.

Have fun with DYL-280. Good luck with your projects.

Regards,

Jonathan Clarke
