

<u>A</u>	
Accessing members of array of structures	6:23
Alternate number systems	2:18-19
Arithmetic operators	3:2-3
Arrays	6:4-5, 6:1
Array of structures	6:22, 6:24-25
Arrays of pointers	8:17-25
Ascii revisited	5:28-29
Assignment operators	3:2-3
Assignment and while loop	3:4
auto Example	7:21
<u>B</u>	
Benefits of using functions	7:3
Binary operators	3:5-6
Bitwise operators	3:19
Break and continue commands	5:37
Break command	5:36
break statement	5:31
<u>C</u>	
C applications	1:3
C features	1:4-5
C character types (char)	2:2
C preprocessor	1:9
C INTEGER TYPES (int)	2:3
Call By Value	7:10-11
CALL to function	7:8-9
Character and formatted I/O - fgetc function	10:13
Command line parameters	9:7
Comment lines	1:26-27
Compiling	1:10
Compile process	1:7
Compound operators	3:7-9
Compound statements	5:4
Conditional operator	5:11-13
Conditional testing- do while	5:14-15
Conditional testing - if/if...else	5:5
Constants	2:21-22, 10:2
continue statement	5:30
<u>D</u>	
Data type lengths	3:16
Datatypes, variables and constants	2:1
Declaration	7:6-7
Declarations	6:2
Declaring integer variables	2:9-10
Double type	2:16-17
Drawing a line with a graphics character	5:26
<u>E</u>	
Equity operators	3:17
Escape sequences	1:25
EXPRESSIONS	3:1
extern	7:23

F	
fclose() function	10:9
FIELD type format specifiers for printf()	4:20
File pointers	10:3
File structure	10:5
Field-width specifiers for printf()	4:13-16
Flag characters for printf()	4:11-12
Float	2:14
Float example	2:15
Float type	2:13
fopen() function	10:6-7
for Loop	5:20
For loop and named constant	3:22
for STATEMENT	5:19
Format specifiers	4:10
Format specifier for scanf() AND printf()	4:28
Formatted I/O: printf()	4:8-9
fprintf() Function	10:15
fputc() function	10:14
fread and fwrite function	10:10-12
fscanf() function	10:16-18
fseek() function to control the file pointer	10:4
Function declaration	9:3-4
Function definition	7:4-5, 1:19
Function description - c	1:16
Function structure	7:2
Functions - c	1:15
Functions	7:1, 9:1
G	
Gets and Puts FUNCTIONS	4:6-7
goto STATEMENT	5:35
I	
Identifiers	1:22-23
Increment operator	3:10-11
Integer variable	2:5-7
Integers	2:12
Initialization of pointers	8:5
Initializing an array	6:6-7
Initializing structures	6:19
Initializing variables	2:23
L	
labeled STATEMENT	5:35
Line command args	9:8-9
Linking	1:11
Living dangerously	8:8
Logical operators	3:18
Long integers	2:11
Loop control	5:1

M

main() function	1:17-18
Multi-dimensional arrays	6:12-14
Multi-statement loop body	5:25
Multiple statements in loops	5:23-24

N

Nested structures	6:21
null statement	5:34

O

Operators	3:1
Origins	1:1
Output functions	1:21

P

Parameters	7:12-15
Passing arguments/parameters to a function	9:2
Passing arrays as function parameters	9:5
Passing structures as function parameters	9:6
Pointer arithmetic	8:9-10
Pointer notations	8:6-7
Pointer values and addresses	8:2
Pointer variables	8:1
Pointers	8:4
Pointers and character strings	8:12
Pointers - declaration	8:3
Precedence	8:11
Precedence and associativity	3:12-13
Precedence and associativity in c statements	3:14-15
Precedence and pointers	8:11
Precision specification	4:17-19
Preprocessor	1:8
Printing characters	4:24
Printing graphic characters	4:21-22
Printing strings	4:23
Program description - C	1:14
Program stages	1:6
Program statements	1:20
Program structure - C	1:13

R

Referencing array elements	6:8-11
Referencing structure members	6:20
Register	7:24-25
Relational operators	3:17
Reserved words in c	1:24
Return() statement	5:32-33

S

scanf() and the address operator (&)	4:26-27
scanf() function	4:25, 4:29-30
Scoping rules	7:16
Shift operators	3:20
Short integers	2:11

Simple statements	5:3
Simple structure	6:16
Special constants	2:20
Standard libraries	4:1
Statements	5:2
static	7:22
stdio.h Library	10:1
Storage	6:3
Storage classes	7:18
Storage class specifiers auto	7:20
Storage classes - summary	7:19
String functions	8:14
String i/o	4:5
String null terminator	8:13
Strings initialized as pointers	8:15
Structure type - declaring	6:17
Structure of the for loop	5:2-22
Structures	6:15
Structures - defining	6:18
Subdirectories	1:12
Switch/case	5:7-10
<u>T</u>	
Terminal character i/o routines	4:2-4
Text and binary	10:8
<u>U</u>	
Unary Operators	3:21, 3:5-6
Use of C	1:2
<u>V</u>	
Variable types	2:8
Variables	2:4
Visibility of external variables	7:17
<u>W</u>	
while loop	3:4, 5:27
While statement	5:16-18
