

A

Access Methods	8:6
Access Path Selection	8:6
Access Paths	5:22
ACQUIRE(ALLOCATE) / RELEASE(DEALLOCATE)	5:14
ACQUIRE(USE) / RELEASE(DEALLOCATE)	5:14
Active Log	9:3
Active Logs - Determining the Size	8:26
ALL	1:13
ANY	1:13
Application Design	5:6
Archive Log	9:4
Arithmetic Expressions	8:4
Audit Trace	7:20
Audit Trails - Implementing	4:2

B

Bind Options	5:13
Basic Predicate	1:12
BIND Process	8:26
Built-in Functions	8:1
Business Rules - Implementing	4:2

C

CAF Capabilities	10:1
CAF Connections - General Properties	10:9
CAF - How to Use	10:5
CAF Return Codes and Reason Codes	10:17
Caching Dynamic SQL Statements	2:7
Calling Other Programs	3:7
Call DSNALI Parameter List	10:11
Catalog in Design - Use	7:33
Change Catalog and Directory - Size and Location	8:27
CHAR Versus VARCHAR	7:17
Checkpoint Records	9:6
CLOSE	10:14
Columns Consideration: NULL or NOT NULL?	7:2
Columns Considerations	7:2
Columns Considerations: Edit Routine	7:3
Columns Considerations: Field Procedure	7:4
Columns Considerations: NOT NULL with Default	7:3
Columns Considerations: Validation Routine for a Table	7:3
Columns to be Updated	8:4
Concurrency	5:1, 9:11
Concurrency and Locks	5:1
Concurrency - Uncontrolled: Problems with	9:11
Concurrent Access	7:7
Concurrent Data Access - Improving	8:24
CONNECT	10:12
Connection Functions	10:6
Correlated and Uncorrelated Subqueries	1:11

Correlated Subqueries	1:11, 1:15
Correlated Subqueries in a DELETE Statement	1:16
Correlated Subqueries in an UPDATE Statement	1:16
Create Table Options	7:21
CREATE TABLESPACE - Options on	7:12
CREATE TRIGGER Statement	4:17
CURRENTDATA Option	5:17
D	
DASD Utilization - Improving	8:22
Data-only Locking	5:12
Data Types - Additional Facts	7:16
Data Types Used in Defining Tables	7:16
Database Design - Recommendations	5:5
Database - Monitoring	4:1, 6:1
Database - Reconstructing	9:7
DB2 - Defining a Stored Procedure	3:3
DB2 Lock Attributes	8:7
DB2 Log	9:2
DB2 Traces	6:2
Deadlock	5:4
Declare a Cursor for the Statement Name	2:17
Design Storage Groups	7:5
Designing a DB2/SQL Data Base	7:6
DISCONNECT	10:15
Distinct	8:4
Distinct Types - Application Programs	1:31
Distinct Types - Creating and Using	1:29
DSNALI	10:7
DSNALI - Explicit Load	10:8
Dynamic Execution - PREPARE and EXECUTE	2:13
Dynamic SQL in Application Programs	2:2
Dynamic SQL for Fixed-list SELECT Statements	2:16
Dynamic SQL - Limited with the Resource Limit Facility	2:10
Dynamic SQL Statements	2:6
E	
EXECUTE Statement	2:15
EXISTS Keyword	1:14
Exit Routines for EDITPROC, VALIDPROC, and FIELDPROC	7:19
EXPLAIN Exercises	8:15
EXPLAIN Statement	6:2, 8:11
F	
Fetch Rows from the Result Table	2:18
FOR FETCH ONLY	1:1
Foreign Key	7:23
Full Outer Join	1:6

G

GROUP BY 8:1

H

Host Language for Dynamic SQL Applications: Choosing 2:11

Host Variables in Static SQL 2:3

I

Index - Clustering 7:26

Index Design Considerations 7:28

Index: `OR` Predicate - Use 8:1

Index - Partitioned 7:27

Index Space Calculation 7:30

Index - Unique 7:27

Indexes and Data-only Locking 5:12

Indexes - Designing 7:26

Inner Join 1:5

Isolation Values - Advantages and Disadvantages 5:15

ISOLATION Option 5:15

J

JCL (Sample) for Using CAF 10:18

Join 8:4

Joining Data from More than One Table 1:5

Joining Table to Itself 8:5

L

Left Outer Join 1:6

`LIKE` Predicate 8:2

LOAD and Run Environments 10:4

Loading Data 9:1

Lock Duration 5:8

Lock Mode 5:9

Lock Mode Compatibility 5:11

Lock Size 5:7

LOCK TABLE 5:21

LOCK TABLE - Effect 5:21

Lock Table Statement 8:8

Locking 9:11

Locks 5:1, 8:7

Log Records - Categories 9:5

Logic Underlying Index Selection 8:9

M

Matching Data Type 8:3

Merge Join 8:10

Modes of Partition Locks 5:10

Modes of Table Locks 5:10

Modes of Table, Partition, and Table Space Locks 5:10

Modes of Table Space Locks 5:10

Monitoring the Database 1:21, 6:1

Multiple Triggers - Ordering 4:16

N

Nested Loop Join	8:10
Nested Table Expressions and User-defined Table Functions in Joins	1:9
`NOT' Predicate	8:2

O

OPEN	10:13
OPTIMIZE-FOR-CLAUSE	1:2
Optional Variables	4:7

P

Partitioned Tablespace	7:9
Passing Parameters in a User-defined Function	1:25
Performance Considerations	9:12
Performance Recommendations	8:1
Physical Table Design	7:5
Predicates	1:11
PREPARE Statement	2:15
Prepared Statements - Keeping After Commit Points	2:9
Primary Key	7:22
Primary Key Constraints	7:22
Processing of Large Tables - Improving	8:24
Programming Language	10:3

Q

Quantified predicates: ALL, ANY, and SOME	1:13
QUERYNO-CLAUSE	1:4

R

Recovery	9:2
Recovery Procedure	9:7
Redundant Predicate	8:5
Referential Integrity	7:22
Referential Integrity - Enforcing	4:3
REORG Utility	6:2
Right Outer Join	1:7
Run Environments	10:4
RUNSTAT Utility	2:1, 6:1

S

Scratchpad in a User-defined Function	1:28
Security	9:8
Security Procedures for Database Users	9:8
Security Procedures for Operations Personnel	9:10
Security Procedures for Programmers	9:10
Segmented Tablespace	7:10
Simple Tablespace	7:8
SOME	1:13
Specifying Isolation by SQL Statement	5:19
Speed of the DB2 Subsystem - Improving	8:19

SQL Efficiency Techniques	6:3
SQL Rules for Statements Containing Join Operations	1:8
SQL Statements - Restrictions When Coding	4:6
Statement Sharing - Conditions	2:8
Static SQL Statements with Input Host Variables	2:5
Stored Procedures - Invoking	4:15
Stored Procedure Linkage Convention GENERAL	3:12
Stored Procedure - Passing Environment Information	3:5
Stored Procedure - Preparing	3:9
Stored Procedure - Running	3:15
Stored Procedure - Special Registers	3:7
Stored Procedures - Setting Up	3:2
STOSPACE Utility	6:2
String Length - Same	8:3
Subqueries	1:10, 1:11
Subqueries and Predicates	1:11
Subquery	8:4
Subquery - Coding	1:12
Subquery or Join	8:4
Subsystem Log	9:2
Summary Data - Updating	4:3
Suspension	5:2
I	
Table Considerations	7:1
Table Design	7:1
Table Logic - Joining	8:10
Table Names - Characteristics	7:14
Table Space Calculation	7:25
Tables - How Many for Each Tablespace	7:18
Task Capabilities	10:2
Task Termination	10:10
Timeout	5:3
TRANSLATE	10:16
Trigger Cascading	4:16
Trigger Characteristics	4:4
Trigger - Creating and Using	4:9
Trigger - Parts	4:10
Triggers	4:2
Triggers - Creating to Obtain Consistent Results	4:16
Tuning Strategy	8:19
Tuning - When to Tune	8:17
U	
Uncorrelated Subqueries	1:11
Unit of Work in CICS	5:24
Unit of Work in TSO: Batch and Online	5:23
User Defined Functions	1:17
User-defined Function as a Main Program or as a Subprogram	1:24
User-defined Function Definition - Components	1:20
User-defined Function Definitions - Examples	1:22
User-defined Function - Passing Parameters	1:25

User-defined Function Programs - Restrictions 1:23
User-defined Function - Writing 1:23
User-defined Functions from Triggers 4:15
User-defined Scalar Function - Creating and Using 1:18

V

Virtual Storage Utilization - Improving 8:23
View Restrictions 7:32
Views - Designing 7:31

W

WITH Clause 5:20
WITH-CLAUSE 1:3
WITH HOLD for a Cursor - Effects 5:18
