DB2 UDB is a registered trademark of IBM Corporation. The information contained in this handout has been compiled from multiple sources, IBM manuals available on the Internet and information available through the public domain.

The presentation outline for this course and workshops was developed by Jonathan Clarke. The content and deliverables of this instructor-led course were reviewed by David Silverberg and David Shapiro.

Portions of this course hand-out were developed in response to a specific client request for the implementation and testing of the replication capabilities and facilities in the IBM DB2 UDB product. The subject matter and instructions are based upon and correspond to the IBM documentation.

This course hand-out is being used within the framework of an educational consulting assignment to assist in explaining and demonstrating how to perform specific tasks and as a reference source. The topics were defined by the client organization to address/examine capabilities/functions of the DB2 UDB product. Jonathan Clarke, Oakwood Computing and Computer Education Techniques, Inc. make no representations regarding originality or copyright.

The following IBM manuals were used and are available from the IBM website.

- SC09-4822 IBM DB2 UDB Administration Guide: Planning
- SC26-1121 IBM DB2 UDB Replication Guide and Reference

Oakwood Computing and Computer Education Techniques, Inc. are always looking to improve the quality of its course handouts. Issues regarding the content need to be forwarded in writing inclusive of the chapter/appendix and page in the form of chapter x; page y.
