

A

Access Control within DB2.....	6:6
Access Path - Efficiency.....	4:71
Access to Data - Restricting.....	8:17
Access via SQL.....	12:59
Accessed Data - Who	7:4
Accidentally Dropped Table, Recovery.....	11:25
Active and Archive Logs.....	1:39, 1:43
Active Log - Writing.....	9:8
Active Logs.....	1:39
Address Spaces	1:32-33
Administrative Authorities.....	6:8, 6:24
ADVISORY.....	10:14
Aggregate Functions During Data Retrieval	13:7-8
Aggregation.....	4:26-28
ALLOW REVERSE SCANS.....	3:48-49
Altering a Table.....	3:19-20
Altering a Table - Restrictions.....	3:21
Application Plans.....	1:26-27
Application Programs.....	10:15-16
Archive Log Data Sets	9:11
Archive Log Data Sets - Locating	9:21
Archive Logs	1:39
Archiving the Log	9:13
Attributes of a Column - Defining	3:63-64
Audit Class Descriptions	7:7-8
Audit Information - Other Sources	7:13
Audit Records - Formatting	7:12
Audit Trace - Starting	7:5
Audit Trace - Stopping	7:6
Auditing	6:3
Auditing a Specific Table.....	7:9-10
Authorities for DB2 Commands	8:14
Authorization IDs.....	6:15
Authorization IDs - Role	7:11
Authorization to Execute	6:29
Authorizations - Information	14:8
Auxiliary Storage.....	2:5-6

B

Backup and Recovery Procedures	11:3
Backward Index Scan	12:9
BSDS.....	9:3
BSDS Copies with Archive Log Data Sets.....	9:19
BSDS Log Inventory - Changing.....	9:20
BSDS: Bootstrap Data Set.....	1:40, 1:44
BSDS: Bootstrap Data Set - Managing.....	9:18
BT - Boolean Term Predicates.....	13:19
Buffer Pools.....	1:41, 1:45
Buffer Pools - Monitoring.....	10:28
Bufferpools.....	12:53
Byte Counts by Data Type	4:5-6

C

Caching Authorization IDs for Best Performance	6:31
Caching IDs for Packages.....	6:32
Calculate Pages for a Nonunique Index	5:23-25
Calculate Pages for a Unique Index	5:20-22
Calculating Pages	5:9
Calculating Record Lengths.....	5:9
Calculating Record Lengths and Pages.....	5:9
Catalog.....	1:17
Catalog Information about Aliases	14:5
CCSIDs	1:28
CHANGELIMIT.....	11:11
CHECK (check-condition)	3:67
Check Constraints - Information	14:11
CHECK OPTION.....	3:42-43
Check-pending - Information.....	14:10
Checkpoint Frequency - Dynamically Changing.....	9:16
CICS Connections - Controlling	10:38-39
CLI.....	1:6
Clustering Index	4:78
Clustering Index - Choosing.....	4:81-83
Clustering Index - What is it?	4:79
Clustering Indexes	3:50-51, 3:56
Clustering versus a Non-clustering Index	4:80
Coded Character Sets.....	1:28
Coded Character Sets and CCSIDs	1:28
Column Placement.....	4:16-18
Column Sequence in a Multi-column Index	4:74
Columns - Information.....	14:6
Commands - DB2 Where Entered	8:11
Commands - Entering at a CICS Terminal	8:12
Commands - Entering from a TSO Terminal	8:13
Commands.....	1:50
Comments - Adding and Retrieving	14:15-16
Commit.....	1:23
Communications Database.....	1:35
COMPRESS.....	2:43
Compression Dictionary - When Does it Get Built?	4:37-38
Consistent Data Types.....	4:7
Constraint.....	3:66
Constraint and Primary Key	3:66
Constraints	1:13, 3:30
Control and Maintenance of DB2.....	1:49
Control Interval Sizing.....	2:7
Control the IRLM.....	10:33-34
Controlling Access to a DB2 Subsystem	6:10
Controlling Access to DB2 Objects	6:13
Controlling CICS Connections	10:38-39
Copying Page Sets and Data Sets	11:20
Copying the Data	11:18
Cost of Updates on Compressed Rows.....	4:36
Cost-based Parallel Sort	12:15
CREATE STOGROUP Example.....	2:18

CREATE INDEX.....	3:45
CREATE STOGROUP.....	2:15-16
CREATE TABLE.....	3:8-14
CREATE TABLESPACE.....	2:31-33
Create Tablespace.....	2:45
Creating a Table with an Identity Column.....	3:77
Creating DB2 Storage Groups.....	2:8

D

Data Access - Controlling.....	6:4
Data Availability - Maximizing.....	11:12-13
Data Compression.....	3:103-108, 5:13
Data - Copying.....	11:18
Data Page.....	5:11
Data Set Management.....	2:13-14
Data Set Protection.....	6:11
Data Sharing Group.....	12:82
Data Types.....	4:3-4
Data Types - Mismatched.....	12:11
Database Design.....	3:80-81
Database Privileges - Explicit.....	6:16
Database Status.....	10:11
Databases.....	1:16, 12:27
Databases - Monitoring.....	10:10
Databases - Starting.....	10:4
Databases - Stopping.....	10:24-25
Datasets - Important.....	12:79
DB2 - Starting.....	8:15-16
DB2 - Stopping.....	8:18
DB2 Accounting Time.....	12:84
DB2 Address Spaces.....	12:17
DB2 Attachment Facilities.....	1:47-48
DB2 Authorization IDs with Granted Privileges.....	6:38
DB2 Base Tables.....	3:3, 3:5-7
DB2 Base Tables and DB2 Temporary Tables.....	3:5-7
DB2 Compression.....	4:33-34
DB2 Compression - When to Use?.....	4:35
DB2 Connect Operation.....	12:69
DB2 Databases - Controlling.....	10:3
DB2 Directory.....	1:36
DB2 Performance Management: Approach.....	3:82-83
DB2 Recovery - Overview.....	11:7
DB2 Storage Groups.....	14:3
DB2 Storage Groups - Creating.....	2:8
DB2 Storage Groups - Managing.....	2:10
DB2 Temporary Tables.....	3:4, 3:5-7
DB2 Uniform Filter Factors by Predicate Type.....	13:24
DB2-managed Data Sets.....	2:4
DB2-managed Data Sets - Deferring Allocation.....	2:11-12
DBADM Authority.....	6:39

DBM1 Address Space.....	12:20
DBM1 Memory Usage.....	12:63, 12:66
DDCS Database.....	12:67
DEFAULT.....	3:26, 3:28
Deferring Allocation of DB2-managed Data Sets	2:11-12
Defines the Attributes of a Column	3:63-64
De-normalization Considerations.....	3:96-97
Derived Columns.....	4:25
Design Implementation	2:19
Directory Table Spaces.....	1:37
DISPLAY PROCEDURE	10:42
DISPLAY THREAD	10:43
DISPLAY WLM.....	10:44
DIST Address Space.....	12:22
DROP VIEW.....	3:40
Dropping a Table.....	3:22
Dropping Objects - Avoiding Accidentally	11:22
DSN1COPY - Restoring Data	11:21
Dual Archive Logging.....	9:12
Dynamic SQL.....	1:5

E

Efficient Predicates - Writing.....	13:11-12
Eliminate Columns Not Dependent On Key - Third Normal Form	3:91-92
Eliminate Redundant Data - Second Normal Form	3:88-90
Eliminate Repeating Groups - First Normal Form.....	3:86-87
Encryption	6:12
ERASE	2:37
Exception Status - Resetting.....	11:17
EXPLAIN Enhancements	12:16
Explicit Database Privileges.....	6:16
Explicit Package Privileges	6:19
Explicit Plan Privileges	6:20
Explicit Table and View Privileges	6:22

F

Factors that Affect Storage	5:3-8
FETCH FIRST	13:28
Field-level Access Control by Views	6:26
Filter Factor	13:23
First Normal Form	3:86-87
FOREIGN KEY references-clause.....	3:74
Foreign Keys - Information.....	14:9
Formulas	13:26-27
Free Space.....	2:38-39
Free Space: Pros and Cons.....	12:44
GENERATED.....	3:26, 3:69
GENERATED - AS IDENTITY	3:70
GENERATED ALWAYS Option	3:27-29
GRANT Database Privileges.....	6:52
GRANT Package Privileges.....	6:53
GRANT System Privileges	6:54
GRANT Table or View Privileges	6:55

H

Handling Nulls in the Application	4:15
Held Lock Status	10:22
Host Variables, Declared Lengths	13:4

I

Ideal Index.....	3:115-116
Identifiers.....	6:5
Identity Column – Creating a Table with	3:77
IDs Authorized to Access a Table	6:40
IDs Granted the Privilege of Updating	6:42
Image Copies	11:9-10
Implementing Databases	2:20-21
Implicit Privileges - Granting	6:28
Implicit Table Space.....	2:25
Index - Cost.....	4:51
Index - Creation.....	3:46-47
Index - Ideal	3:115-116
Index - Improve Performance.....	4:50
Index - Maintenance.....	4:52
Index - Uniqueness	4:49
Index - What is it?	4:45
Index Columns - Filtering	4:69
Index Design - Multi-column Index or Multiple Indexes	4:67
Index Design Considerations	3:111
Index Design Guidelines	4:64
Index Maintenance	4:73
Index Screening Predicates	4:56-57
Index Space Calculations.....	5:18-19
Index Space with Restrictions - Starting	10:7-9
Index Structure - Three-level.....	4:46
Indexable and Nonindexable Predicates	13:16
Indexable Predicates.....	13:16
Indexable Predicates - Matching.....	4:53-55
Indexes.....	1:11, 1:30-31, 3:44, 12:41, 12:45, 3:114
Indexes - Information	14:7
Indexes - NOT PADDED.....	4:75
Indexes - NOT PADDED and PADDED.....	4:75
Indexes - PADDED	4:75
Indexes - Types.....	3:54
Indexes - What Should be Created.....	3:52-53
Indexes - When to Build.....	3:114
Indexes - Why Build?	4:47-48
Indexes for Avoiding Sorts	3:24
Indexing Strategy - General	4:65-66
Index-only Access.....	4:63
Indoubt Units of Recovery - Displaying.....	10:40
Interpolation Formulas	13:25
IRLM - Control.....	10:33-34
IRLM - Starting	10:35
IRLM Address Space	12:21

J

Java Database Connectivity.....	1:29
Join Sequence - Unknown	12:13

K

Key Design.....	4:19-21
Keys	1:12

L

Large Tables - Loading	3:109-110
LIKE Option	3:17
LIKE table-name or view-name.....	3:76
List Prefetch	4:58-60
Listing Views	6:37
Lock State	10:18-20
Lock Status	10:17
Lock Type.....	10:21
Locking.....	1:23
Locking, Commit, and Rollback	1:23
LOCKMAX.....	2:42
LOCKS ONLY	10:23
LOCKSIZE.....	2:41
Log and BSDS	9:3
Log Records - Creation	9:6
Log Records - Retrieval	9:7

M

Maintenance of DB2.....	1:49
Materialized Query Table	12:3
Materialized Query Table: Creation	12:6
Materialized Query Tables	4:29-30
Materialized Query Tables and Query Performance	13:10
Maximizing Data Availability.....	11:12-13
Memory Usage.....	12:61-62, 12:65
Minimum and Maximum Values	3:71
Mismatched Data Types	12:11
Monitoring Buffer Pools.....	10:28
Monitoring Databases	10:10
Monitoring Online Utilities	10:32
Monitoring Threads	10:36-37
Monitoring User-defined Functions.....	10:30
MSTR Address Space.....	12:19
Multi-column Index - Column Sequence	4:74
Multilevel Security	6:45
Multilevel Security - Advantages.....	6:46
Multilevel Security with DB2 - Implementing	6:49
Multilevel-secure Environment - Working with Data	6:51
Multiple Index Access	4:72

N

Naming the Table	3:62
Nonindexable Predicates	13:16
Nonpartitioned Indexes	4:88
Normalization	3:84-85
NOT NULL	3:26
NOT NULL	3:65
NOT NULL, DEFAULT, and GENERATED	3:26
NOT PADDED	3:23
NOT PADDED and PADDED Indexes	4:76-77
NPI - Advantages	4:89
NPI - Disadvantages	4:90
NULL	4:14
NUMPARTS Integer	2:40

O

Object with a Specific Status - Starting	10:6
Objects	6:47
Offloading	9:9
ON Clause, Predicates in the	13:20-21
Online Utilities - Monitoring	10:32
Operator Commands - DB2	8:3-10
OPTIMIZE FOR and FETCH FIRST	13:29
Ownership of Objects - Establishing	6:27
Ownership Privileges	6:9

P

Package Privileges - Explicit	6:19
Packages and Application Plans	1:26-27
Packages Plans	1:26-27
Packages that Access a Table	6:44
Page Sets and Data Sets - Copying	11:20
Page Size	4:39, 3:93-95
Page Size - Choosing	2:27-28
Page Size and I/O Cost	4:44
Page Sizes - Larger	2:29-30
Pages	12:46
Parallel Sysplex	12:81
Partitioned Partitioning Index	4:86-87
Partitioned Table Spaces	3:98-102
Partitioned Tables - Indexing	4:84-85
Partitioning - Benefits	4:31
Partitioning Considerations	4:32
Partitioning Indexes	3:57, 3:112-113
Plan Privileges - Explicit	6:20
Plans and Packages that Access a Table	6:44
Plans that Access a Table	6:44
Point of Consistency - Establishing	11:19
Predicate Definitions	13:14
Predicate Filter Factors	13:22
Predicate Types	13:15
Predicate Use	4:68

Predicates - All, Coded Correctly	13:3
Predicates - Properties	13:13
Predicates in the ON Clause	13:20-21
Preparing for Recovery	11:4
Primary Key	3:66
PRIMARY KEY (column-name,...)	3:72
Prior Point of Consistency - Recover, Preparing	11:16
PRIQTY Integer	2:35
Privileged - Who is	7:3
Privileges	1:34

Q

Query Involve Aggregate Functions	13:6
Query Written to Use a Noncolumn Expression	13:9
Quiescing Activity Before Offloading	9:15

R

Read-only and Updatable Views	3:41
Record Size	3:93-95
Record Size - Maximum	5:12
Record Size and Page Size	3:93-95
RECOVER	11:6
Recovery - Events which Occur	11:5
Recovery Cycles - Complete	11:8
Recovery Information	11:14
Recovery Information - Reporting	11:15
Recovery of an Accidentally Dropped Table	11:25
Recovery, Procedures	11:23
REFERENCES table-name (column-name,...)	3:75
Resource Limit Facility Database	1:42
Restores, Suggestion	11:24
Restoring Data by Using DSN1COPY	11:21
RESTRICT	10:13
Restricting Access to Data	8:17
Retrieving All IDs that Can Change the Sample Employee Table	6:41
Retrieving All IDs with DBADM Authority	6:39
Retrieving IDs Authorized to Access a Table	6:40
RLST Database	12:70
Rollback	1:23
Rolling Back Work	9:5
Routines	1:22
Row Level Security	6:50
Rows Per Page	4:40-43

S

Schemas	1:7, 3:25
Second Normal Form	3:88-90
Secondary Indexes	3:58-59
SECQTY Integer	2:36
Security	6:3
Security Labels	6:48
Security versus Auditing	6:3

Segmented or Partitioned Table Spaces	3:98-102
Segmented Table Spaces.....	3:98-102
SEGSIZE Integer	2:44
Sequences	1:21, 6:36
Sequences - Information	14:14
SMS for Managing DB2 Storage Groups.....	2:10
Sort Avoidance.....	4:61-62
Space Requirement - Total	5:27
SPAS Address Space	12:23
SQL	1:3
SQL - Dynamic.....	1:5
SQL - Static.....	1:4
SQL Types	12:60
Stage 1	13:18
Stage 1 and Indexable Predicates	12:10
Stage 1 and Stage 2 Predicates	13:17
Starting the IRLM	10:35
Starting User-defined Functions	10:29
Static SQL.....	1:4
Status Codes.....	B:1
Step 1 Recovery.....	11:26
Step 2 and 3 Recovery.....	11:27
Step 4 Recovery.....	11:28
Step 5 Recovery.....	11:29
Step 5 Recovery.....	11:30
Step 6 Recovery.....	11:31
Step 7 Recovery.....	11:32
Step 8-11 Recovery	11:33
STOGROUP.....	2:34
STOP Examples.....	10:26-27
Stopping Databases.....	10:24-25
Stopping User-defined Functions.....	10:31
Storage, Estimating When Using the LOAD utility	5:14-17
Storage Group.....	2:3, 12:24
Storage Structures	1:15
Stored Procedures	6:35
Stored Procedures - Monitoring and Controlling.....	10:41
Storing Tables in the Database.....	3:18
Subqueries in a Query	13:5
Surrogate Key - Consider When	4:22
SYSDEFLT.....	2:9
System Checkpoint - Monitoring.....	9:17
I	
Table - Altering.....	3:19-20
Table - Creation	3:15-16
Table - Dropping	3:22
Table - Information.....	14:4
Table - Naming.....	3:62
Table and View Privileges - Explicit.....	6:22
Table Check Constraints.....	3:33-34

Table Example	3:78
Table Example - Foreign Key.....	3:79
Table Space - Creating Explicitly	2:23-24
Table Space - Implementation	2:22
Table Space or Index Space with Restrictions - Starting.....	10:7-9
Table Space with Restrictions - Starting	10:7-9
Table Spaces	1:18-19
Tables.....	1:8, 12:39
Tables - Storing in the Database	3:18
Tables an ID is Authorized to Access	6:43
Table Space Name	2:26
Table Spaces	12:30
TEMP Database.....	1:46, 12:77
Third Normal Form	3:91-92
Threads - Monitoring.....	10:36-37
Trigger Enhancements.....	12:14
Triggering Offload	9:10
Triggers	1:14
Triggers - Information.....	14:13
U	
Unique Constraints.....	3:31-32
Unique Indexes	3:55
UNIQUE(column-name,...)	3:73
Uniqueness - Enforcing.....	4:70
Unit of Recovery.....	1:25
Unit of Work	1:24
Units of Recovery	9:4
Unknown Join Sequence	12:13
Updates - Cost on Compressed Rows.....	4:36
Use of Controls - Recommendation Against.....	6:33
User-defined Data Types	3:60-61
User-defined Functions	6:34
User-defined Functions - Monitoring.....	10:30
User-defined Functions - Starting	10:29
User-defined Functions - Stopping	10:31
User-defined Functions and Stored Procedures.....	14:12
Users	6:47
Utilities.....	1:51
V	
VARCHAR.....	4:8-11
VARCHAR Performance Savings	4:12
VARCHAR Recommendation	4:13
Varying-length Index Keys Performance Benefits	12:7
View - Creation.....	3:38-39
Views.....	1:20, 3:35-37
Views - Listing	6:37
Volatile Tables.....	4:23-24
VOLATILE	13:30-31
Volume Processing	2:17

W

Wildcards..... 10:12
Work File Database..... 12:73
Work File Database Usage 12:75
Writing Efficient Predicates 13:11-12
