Endevor and Endevor Software Change Manager Quick Edit is a registered trademark of Computer Associates. The information contained in this courseware has been compiled by request at client installations using Computer Associate reference manuals and information available in the public domain.

The presentation outline, subject matter, and workshops for this courseware were developed by David Silverberg. It has been edited and reviewed by David Shapiro.

Reference to 3270 screens utilizes the upper case presentation of Endevor instructions and commands; explanations to concepts and terminology are done in accordance with American English grammar.

In this course hand-out, Quick Edit is presented and spelled as two separate words. There are screens and panels in which Computer Associates makes reference to "Quick-Edit"; for purposes of accuracy as a reference aid this usage will be maintained in this courseware.

For purposes of consistency, the term "dataset" is used for defining terms and explaining concepts. The term "data set" used by Computer Associates in screens and menus is used as is. Our research and experience indicates that reference is made to both dataset and data set in the software and its reference manuals.

Mainframe training aids are available at:
