

**A**

Accessing File-AID .....	2:1
Allocation Parameters - Verifying .....	3:7
Apply Changes/Confirm Update .....	6:18
Asterisk .....	1:9
Audit File Allocation Parameters .....	1:7

**B**

Batch JCL - Generate .....	7:6
Batch JCL Information - Generating .....	3:9
Browse - Dataset Specification .....	2:11
Browse a Sequential Dataset .....	2:9
Browsing a Data File .....	2:3
Browsing Formatted Data Records with an XREF .....	10:15

**C**

Change Criteria - Specifying .....	6:17
CHANGE Command: Changing Data .....	4:8
Change Results Preview - Viewing .....	6:13
CHANGE to All Selected Members - Specifying .....	6:12
Cluster Allocation .....	3:6
Coding Conventions .....	11:9
Compare - Criteria Options: Selecting .....	5:5
COMPARE Function .....	11:18
Compare Function (Option 10) - Accessing .....	5:2
Compare Report - Analyzing .....	5:8
Compare Summary Report - Viewing .....	5:9
Comparing Files .....	5:1
Compound AND Condition - Defining .....	2:25
Control Cards .....	11:10
Copy Request - Definition .....	7:2
COPY (C) Function .....	11:19
Current Field Length and Format - Displaying .....	2:30

**D**

Data File Dataset .....	1:12
Data - Types that May be Scanned .....	2:16
Dataset Identifier .....	11:11
Dataset's Allocation Attributes .....	3:5
Datasets - Scanning and Updating .....	6:1
Default Base Layout - Setting .....	10:10
Default Setting Panel .....	1:8
DISPLAY Command .....	2:31
DROP (DR) Function .....	11:20
DUMP (D) Function .....	11:21

**E**

EDIT - AUTOSAVE Command .....	4:14
EDIT - CREATE Command .....	4:15
EDIT - CREATE/REPLACE .....	4:16
EDIT - Dataset Specification .....	3:11
EDIT - REPLACE Command .....	4:16
Edit Function - Option 2: Accessing .....	4:4
ESDS: Entry-Sequenced Datasets .....	3:2
Example: Initializing New Fields .....	9:7
Excluding Fields from the Display .....	2:32
Executing Compare .....	5:7
Extended Allocation Parameters - Specification .....	3:8

**F**

Field Number Specification for Conducting a Search for Invalid Data .....	4:6
File-AID Default Parameters - Setting .....	2:2
File-AID/SPF .....	1:2
File-AID/SPF - What is it .....	1:1
File-AID/SPF - Why use it .....	1:1
FORMATTED EDIT Commands .....	4:3
Formatted Field Criteria - Specifying .....	5:6
Formatted Field Selection Criteria - Defining .....	2:23
Formatted Selection Criteria .....	2:14
Formatted Selection Criteria Screen .....	2:19
Formatted XREF Criteria - Beginning Data-Name .....	10:9
FPRINT (FP) Function .....	11:22
Full-Screen Editing .....	4:1
Function Descriptions .....	11:3
Function/Dataset Organization Identifier .....	11:11
Function Modifiers .....	11:3
Functions .....	11:18

**G**

Generated Copy JCL - Editing .....	7:7
Global Changes - Specifying .....	6:16

**H**

Hexadecimal Data .....	2:16
Hex Browse .....	2:10

**I**

Informational Flags from the Display - Removing .....	4:5
Input and Output Datasets - Specifying .....	9:9
Interpreted Layout - Viewing .....	8:3
ISPF Parameter Options .....	1:5
ISPF/PDF .....	1:2
ISPF/PDF vs. File-AID/SPF .....	1:2

**J**

JCL Execution .....	3:12
JCL Edit Screen .....	3:10
JCL Required for Execution .....	11:15
JCL - Saving .....	3:12

**K**

KSDS: Key-Sequenced Datasets .....	3:3
------------------------------------	-----

**L**

Last Referenced File List .....	2:7
Layout in Column Location Order - Viewing .....	2:22
Layout Selection Rules - Definition Formatted Criteria .....	10:5
Layout Structure from an Available Layouts List-Selecting .....	10:9
Layout Usage - Automating with XREF Chap .....	10:1
LIST (L) Function .....	11:22
Logical AND Conditions - Coding .....	11:29
Logical Conditions .....	11:29
Logical OR Conditions - Coding .....	11:29

**M**

Member Hits .....	2:4
Members (Selected) - Editing or Browsing .....	6:11
Mode Prompt Message Line - Removing .....	2:33
Modifier Descriptions .....	11:3

**N**

"New" Dataset - Specifying .....	5:3
New Record Creation - Copying the Currently Displayed Record .....	4:9
New Reformat Definition - Creating .....	9:2
New XREF Member - Creation .....	10:2
New XREF Member - Saving .....	10:12
Next Record in the Dataset - Displaying .....	2:28

**O**

Offset for Each Field - Displaying .....	2:29
--	------

**P**

Packed Decimal Data .....	2:16
Parameter Identifier .....	11:12
Parameter Function Descriptions .....	11:6
Parameter Selection Menu .....	1:4
Parameters .....	11:5
Pattern Characters .....	1:9
PDS Find/Change Screen: Issuing Commands .....	6:10
PDS Find/ Change Member List of Selected Members - Generating .....	6:4
PDS (Initial) Find/Change Member List - Viewing .....	6:9
PDS Member Processing and Selection Features .....	7:3
PDS Members - Selected (Copying) .....	7:1
PDS Member Selection Features .....	6:6
PDS Processing Options .....	2:4

Percent (%)	1:10
Plus (+)	1:11
PPO Member Filters	10:7
Primary Option Menu	1:3
Print Parameters	1:6
PRINT (P) Function	11:23
Printing the Currently Displayed Record	4:7
Processing Parameters	1:7
Protecting Keys	4:5
Protecting New Record Key Fields	4:10
<b>Q</b>	
Question Mark (?)	1:10
Question Mark (?) and Percent (%)	1:10
Quick Selection Criteria - Specifying	6:7
<b>R</b>	
Record Layout Cross Reference	10:13
Record Layout Specification - Interpretation	8:2
Record - Navigating by Its Key Value	4:11
Records Not Selected Line - Controlling	2:33
Reformat Definition Editor	9:4
Reformat Online at a Terminal - Executing	9:9
REFORMAT (R) Function	11:23
Reformatted File - Browsing	9:10
Reformatting Records	9:1
RLPRINT (RLP) Function	11:24
RRDS: Relative Record Datasets	3:2
<b>S</b>	
Scan Results - Browsing	6:15
Scanning Datasets for Specific Records	6:14
Scanning Parameters	11:14
Scanning and Updating Datasets	6:1
SCPRINT (SCP)	11:24
Search/Update Request - Defining	6:2
Selecting Members by Content	11:31
Selecting Members by Name	11:31
Selecting Records to Browse	2:5
Selection Criteria - Establishing	9:8
Selection Criteria Menu	2:12
Selection Criteria Options	2:14
Selection Criteria Options - Specification	2:17
Selection Criteria Parameters	1:6
SHOW Command	2:20
Slash (/)	1:10
Sorting the Records of the Dataset	4:13
Source and Target Record Layouts - Identification	9:3
Specify Record Layout and XREF Information	2:8
Specifying Execution Options	5:4
System Parameters	1:5

**T**

TALLY (T) Function .....	11:25
Temporary Selection Criteria .....	2:5
Temporary Selection Criteria - Specification .....	2:13, 7:5
Type of Field Information to Display - Specifying .....	2:29

**U**

UNDO: Reversing Changes .....	4:12
Unformatted Data Test (Specifying) .....	7:5
Unformatted Field Selection Criteria - Defining .....	2:25
Unformatted Selection Criteria .....	2:15
USER (US) Function .....	11:26

**V**

Vertical Format .....	2:12, 2:14
Vertical Format View .....	2:27
View Layout Utility .....	8:1
VPRINT (VP) .....	11:28
VSAM Cluster - Allocating .....	3:1
VSAM Data Sets - Types .....	3:2
VSAM Information .....	3:13
VSAM Utility - Option 3.5 - Accessing .....	3:4
VSAM Utility Option - Choosing .....	3:4
XREF Criteria .....	10:8
XREF Criteria Formatted .....	10:8
XREF Criteria UnFormatted .....	10:8
XREF Definition .....	10:3
XREF - Exiting and Returning to Main Menu .....	10:13
XREF Member - Record Layout Usage .....	10:14
XREF Usage - Requesting .....	10:16
