

**A**

Alignment Attributes	6:11
Alignment within Structures	6:12
ANY	7:12
Arithmetic Built-in Functions	8:10
Arithmetic Data Declare	2:1
Arithmetic Data Types	2:4
Array	7:10
Array Assignments	7:11
Array Handling Functions	8:9
Array Initialization with Unique Values	7:1
Array Operations	7:5
Arrays	7:9
Assignment Statement	3:5
Automatic Storage	5:10
Automatically Disabled Conditions	9:11
Automatically Enabled Conditions	9:10

**B**

Begin Blocks	8:19
Begin Blocks within ON-Units	9:4
Built-in Function	8:2
Built-in Subroutines	8:15

**C**

Calling a Procedure with Arguments in Dynamic Storage	8:23
Calling a Procedure with Arguments in Static Storage	8:24
Carriage Control Character	6:33
CLOSE Statement	4:4, 6:17
Combination of Operations	3:22
Common PL/I Errors	10:1
Compile Time Facility (Pre-Processor)	10:2
Concatenation Operator	3:11
Condition Handling Built-in Functions	9:13
Condition Prefixes	9:12
Cross-Sections of Arrays	7:6

**D**

Data Directed I/O	4:7
Data Structures	6:1
Data Set Organizations	6:24
Data Transmissions: Types	4:1
Date and Time Built-in Functions	3:2
Declaration of Strings	2:5
Declare Filename File Attributes	6:26
Declare Statement Formats	2:15
Declaring Stream Files	4:2
Defined Attribute	6:4, 6:8
Defining Array Sizes	7:7
Defining Files	6:25
DO Group-Form 1	3:25
DO Group-Form 2	3:26
DO Group-Form 3	3:27
DO Group-Form 4	3:28

DO GROUP .....	3:15
DO WHILE .....	6:19
Dummy Arguments .....	8:26
<b>E</b>	
Edit: Directed Data Specification .....	4:8
Enabled/Disabled Conditions .....	9:8
Environment Attribute .....	6:15
Error Condition .....	9:6
Error Correction Using ONCHAR .....	9:15
Example: Counting the Number of Temperatures > 35 C and < 25 C .....	3:21
Example: Sequential Access .....	6:23
Example: Sort Program .....	8:30
Exceptional Conditions .....	9:1
External Function Reference .....	5:8
External Subroutines .....	5:7
External Subroutines Entry Statement .....	5:5
<b>F</b>	
Fixed Binary Declare .....	2:2
File Declare .....	6:14
Fixed Decimal Declare .....	2:2
Floating Point Declaration .....	2:3
Flow of Control .....	8:20
Function Procedure: Invoking .....	8:21
<b>G</b>	
Goals of a Good Program .....	1:2
<b>H</b>	
Hierarchy of Operations .....	3:6
<b>I</b>	
I/O Operations and Arrays .....	7:9
I/O Example Using DO WHILE and ENDFILE .....	3:32
Identifiers: Declaring with the Bit Attribute .....	2:10
IF Statement .....	3:14, 3:16, 3:19
Initial Attribute .....	2:11
Initial Attribute .....	2:7
Internal and External Subroutines .....	5:7
Internal Subroutine: Invoking .....	5:3
Internal Subroutines .....	5:7
Iterative DO Group .....	3:24
Iterative DO: Various Forms .....	3:34
<b>L</b>	
LEAVE Statement .....	3:30
Like Attribute .....	6:7
List Directed I/O .....	4:6
Logical (Bit String) Operators .....	3:12
<b>M</b>	
Miscellaneous Functions .....	8:12

**N**

Nested DO Groups and Leave .....	3:31
Nested IF Statement .....	3:18
Non-Iterative DO Group .....	3:23
NULL ELSE .....	3:17
Numeric Array Initialization .....	7:2

**O**

ON ENDPAGE .....	9:5
ON-Units .....	9:2
ON-Units: Commonly Used .....	9:3
OPEN .....	6:29
OPEN Statement .....	4:3, 6:16
Opening and Closing Files .....	6:28
Operators in the Assignment Statement .....	3:1
Other Forms of Operative DO Groups - Form 5 .....	3:29

**P**

Passing an Argument to the Main Procedure .....	10:3
Permanently Enabled Conditions .....	9:9
Picture Attribute .....	2:12
Picture Characters .....	2:13
PL/I Advantages and Disadvantages .....	1:1
PL/I Built-in Functions: Purpose and Function .....	8:1
PL/I Constants .....	3:3
PL/I Features of PL/I .....	1:3
PL/I Operator Priority .....	3:7
PL/I Program Structure .....	8:18
PL/I Sort Feature .....	8:27
PL/I String Assignment .....	3:9
Prefix Operators .....	3:8
Procedure Blocks .....	5:2
Procedure Statement: Syntax .....	5:4
Program Checkout: Dump and Facility .....	10:4
Program Structure Blocks .....	5:1

**R**

READ Statement .....	6:18
Record I/O .....	6:13, 6:31
Record I/O: Read and Write .....	6:30
Record Input and DO WHILE .....	6:19
Record Output Considerations .....	6:32
Repetition in String Initialization .....	7:3
Returning Results to a Calling Program .....	8:25
Returns Attribute in Functions .....	8:22
REWRITE Statement .....	6:22
Rules for Identifiers .....	3:4

**S**

Sample Program .....	1:5
Scope of Declaration .....	5:12
SELECT Statement .....	3:36
SELECT Statement - Example .....	3:35
SIGNAL Statement .....	9:7
Sort Data Sets .....	8:29
Sort Optional Arguments .....	8:29
Special Characters .....	1:6
Static Storage .....	5:11
Storage Classes .....	5:9
Stream I/O Function .....	8:14
Stream I/O Statements .....	4:5
String Array Initialization .....	7:4
String Built-In Functions .....	8:4
String Data .....	2:8
String Handling Functions .....	8:3
String Operator .....	3:10
Structure Assignment .....	6:5, 6:9
Structure Assignment By Name .....	6:6, 6:10
Structure Declarations .....	6:3
Structures: A Hierarchical Collection of Data .....	6:2

**T**

Termination .....	5:6
-------------------	-----

**V**

Varying Length Strings .....	2:6
Verifying for Numeric .....	9:16

**W**

WRITE Statement .....	6:21
-----------------------	------
