

& Operator	6:9
A	
Accessing the Microsoft Windows API	9:1
Activating a Window Application - AppActivate	1:3
ActiveX Components	14:1
ActiveX - Using	14:3
Adding Controls at Run Time	4:3
Adding a Project	15:2
Adding Items to the ImageCombo	12:20
Adding or Removing a Project	15:2
Adding/Removing Items	4:8
Adding and Deleting Controls at Run Time	4:3
ADO Data Control	12:1
ADO Data Control - Controls that Bind to the ADO Data Control	12:4
ADO Data Control - Setting Database-Related Properties	12:2
Ambiguous References	14:6
Ambiguous References and Reference Priority	14:6
API Viewer Application	9:2
AppActivate	1:3
App Object	1:1
Applications with Multiple Windows	10:2
Arranging Child Forms	10:11
Assigning an Object Reference Using the New Keyword	14:13
Avoiding DoEvents When Using Global Data	15:33
B	
Bound Controls	11:1
Browsing Objects	14:8
ByVal Option	9:8
C	
Calendar Control	12:17
Call Statement	9:9
Canceling a Print Job	3:14
Changing Displayed Data at Run Time	12:10
Checkbox to Select No Date	12:16
Child Forms - Arranging	10:11
Choosing an Interface	10:5
Clear Method	1:8
Clipboard Object	1:8
Close VB Combo Box with ENTER Key	13:4
Collection Element - Referencing	4:7
Collection Object	4:4
Collection Objects - Destroying Collection Objects	4:5
Collection Object - Properties	4:6

Command Line Switches	15:16
Conditional Compiles	15:9
Conditional Compilation Constants - Declaring	15:10
Connect Argument	11:20
Connection Object	11:13
Control Array	4:1
Control Array - Creating	4:2
Control Print Placement	3:4
Creating a Control Array	4:2
CurrentX, CurrentY Properties	3:5
D	
DAO Collections	11:5
DAO Objects	11:4
Data Access Object - DAO	11:3
Data Access Objects	11:2
Data Control	11:1
Data Manipulation	11:7
Data Type Conversion Functions	6:1
Databases Collection	11:8
Database - Opening	11:7
DataCombo Controls	12:8
DataCombo and DataList Controls	12:8
DataGrid Control	12:9
DataGrid Control - Using the Design-Time Features	12:9
DataList Control	12:8
Dates - Setting and Returning	12:15
DateTimePicker Control	12:15
DBEngine Objects	11:6
DBEngine and Workspace Objects	11:6
DDE - What is it	2:1
Declare Statement	9:6
Declaring Conditional Compilation Constants	15:10
Declaring Variables of a User-Defined Type	15:20
Deleting Controls at Run Time	4:3
Defining Record Types	7:3
Design Time Settings of MDI Child Forms	10:9
Displayed Data at Run Time -Changing	12:10
Distribution	12:18
DoEvents	15:30
DoEvents - Avoiding When Using Global Data	15:33
DoEvents Call - What Happens During	15:34
DragDrop Event	5:8
DragMode Property	5:10

E	
Enum Data Type	15:25
EOF and LOF Functions	7:14
EOF Functions	7:14
Err Object	8:1
Error, Error\$ Function	8:5
F	
Fields Collection	11:12
File Access Types	7:1
FileCopy Statement	6:2
FileDateTime Function	6:3
FileLen Function	6:4
FindFirst, FindLast, FindNext, FindPrevious Methods	11:14
FindFirst Method	11:14
FindLast Method	11:14
FindNext Method	11:14
FindPrevious Method	11:14
Flashing Title Bar	13:10
Floating Windows	13:12
Font Properties - Setting	3:3
FontName Property	3:8
For Each...Next Statement	4:10
Form with No Title Bar	13:3
G	
Get and Put Statements	7:6
Get Statement	7:6
GetAttr Function	6:5
GetData Method	1:13
GetFormat Method	1:12
GetText Methods	1:9
Getting hWnd handle for a Control	9:10
Guidelines/Procedures	8:4
H	
Hierarchical Recordsets - Displaying	12:13
I	
ImageCombo - Adding Items	12:20
ImageCombo Control	12:19
Indentation of List Items- Changing	12:22
InProcess/OutProcess	14:2
Input # Statement	7:8
InStr Function	6:10
Interface	10:5

Interface Styles	10:5
Interrupting Tasks	15:28
Item's Picture - Setting	12:21

L

LIB - Searching for	9:7
Like Operator	6:8
Line Input Statement	7:10
Line Method	3:18
LinkClose Event	2:9
LinkClose and LinkError Event	2:9
LinkError Event	2:9
LinkExecute Event	2:7
LinkItem Property	2:3
LinkMode Property	2:4
LinkNotify Event	2:8
LinkTimeout Property	2:10
LinkTopic Property	2:2
Load Statement	10:4
Loc Function	7:15
lockedits Argument	11:25
LOF Functions	7:14
LTrim, LTrim\$, RTrim, Rtrim\$, Trim, Trim\$ Functions	6:13
LTrim Function	6:13
Ltrim\$	6:13

M

MDI Application - Creating	10:8
MDI Applications	10:7
MDI Child Forms	10:9
Microsoft Jet Workspace	11:7
Microsoft Windows API	9:1
MouseDown, MouseUp Events	5:1
MouseIcon Property	5:7
MouseMove Event	5:4
MousePointer Property	5:5
MoveFirst, MoveLast, MoveNext, MovePrevious Methods	11:16
MoveLast Method	11:16
MoveNext Method	11:16
MovePrevious Method	11:16
MSHFlexGrid Control	12:13
Multiple-Page Documents	3:13
Multiple Projects	15:1

N

Nesting Data Structures 15:23
 No Windows Program 10:1

O

Object Variable - Creating 14:10
 Object Reference - Assigning Using CreateObject 14:14
 Object Reference - Assigning Using GetObject 14:15
 Object Reference - Assigning Using the New Keyword 14:13
 Object's Events - Responding to 14:19
 Object's - Methods 14:17
 Object's - Properties 14:17
 Object's - Properties and Methods 14:17
 OLE DB Data Link 12:5
 OLE DB Data Link - Creating 12:5
 On Error Statement 8:3
 Open Statement 7:4
 OpenDatabase Method 11:18
 Opening Files for Random Access 7:5
 Opening a Database 11:7
 OpenRecordset Method 11:21
 Option Compare Statement 6:12
 options Argument 11:23
 Ordinal Numbers for Identifying DLL Procedures 9:13

P

Page Property 3:7
 Pictures with ImageCombo List Items 12:20
 Print # Statement 7:11
 Print Fonts 3:2
 Print Job - Canceling 3:14
 Print Method 3:15
 Printer Components 3:1
 Printer Object - Using 3:11
 Printers Collection - Using 3:10
 PrintForm Method - Using 3:9
 Printing Under Visual Basic 3:9
 PSet Method 3:20
 Put Statement 7:6

Q

QueryDefs Collection 11:10
 Quick View to View DLLs 9:14

R

Raising Error - The Raise Method 8:8

Ranges of Error Codes 8:2

Recordsets Collection 11:11

Recursively Deleting Files and Directories from a Disk 13:1

Referencing a Collection Element 4:7

Reference Priority 14:6

Referencing an Object 14:5

Registry 15:5

Registry Entries - Deleting 15:8

Registry - Saving & Restoring Entries 15:5

Registry Values - Retrieving 15:6

Removing a Project 15:2

Resource Files 15:12

Resources - Adding to a Project 15:12

Resources - Using in Code 15:13

Responding to an Object's Events 14:19

Resume Statement 8:7

RTrim Function 6:13

Rtrim\$ Function 6:13

S

ScaleHeight Properties 3:6

ScaleHeight, ScaleWidth Properties 3:6

ScaleWidth Properties 3:6

Screen Fonts 3:2

Screen and Print Fonts 3:2

Search in Windows Help 13:5

Search for LIB 9:7

Seek Statement 7:17

Selected Item Image 12:21

SelLength Properties 1:11

SelLength, SelStart, SelText Properties 1:11

SelStart Properties 1:11

SelText Properties 1:11

Sending Keys to an Application 1:4

SetText and GetText Methods 1:9

SetText Methods 1:9

Setting Constants on the Command Line 15:11

Setting Constants on the Project Properties Dialog Box 15:10

Setting an Item's Picture 12:21

Settings 11:19

Shell - Starting a Window Application - Shell 1:2

Show and Hide Method 10:3

Starting a Window Application - Shell 1:2

Startup Project - Specifying 15:4

T

TableDefs Collection 11:9

Templates 15:14

TextHeight and TextWidth Methods 3:5

TextHeight Methods 3:5

TextWidth Methods 3:5

TOPMOST or "Floating" Windows 13:12

Trim Function 6:13

Trim\$ Function 6:13

type Argument 11:22

Type Functions 6:6

Type Statement 7:2

U

User Data Types 15:20

User-Defined Types that Contain Arrays 15:21

User-Defined Types that Contain Objects 15:23

User-Defined Types - Passing to Procedures 15:22

V

Validation 11:2

VarType Function 6:7

Visual Basic Programs - Compiling 15:17

W

What Happens During a DoEvents Call 15:34

Window Menu 10:10

WindowList Property - Setting it 10:10

Windows API Procedures that Use Strings 9:11

Windows WNetAddConnection 13:6

Working with Windows API Procedures that Use Strings 9:11

Write # Statement 7:12

Z

Zorder Method 6:14
