**SYS-ED**®

The Computer Education Professionals

## Who is SYS-ED

SYS-ED is a multi-faceted computer training company offering open enrollment courses, private client-site courses, and integrated training programs in North America and Europe. We offer over 1000 state-of-the-art courses in operating systems, networking, E-Commerce, databases, programming languages, and systems software.

SYS-ED is uniquely qualified to provide a total training and consulting solution to organizations of various sizes and needs. We have trained over 1,000,000 satisfied students on a wide range of platforms and operating environments including client/server, Microsoft, IBM mainframe, ORACLE, and UNIX. In response to changes in technologies and the evolving needs of our clients, we typically add 30 to 50 new courses each year!

Our trainer and consultant groups average over 30 years of business and application experience. They understand the real world use of the software and the challenges you may encounter back on the job. SYS-ED's group of highly qualified computer specialists can make the difference in the way your firm utilizes technology and maximizes its return on investment in computer technology.

## Distance-learning

SYS-ED offers on-line training tailored to your specific operational objectives through the Internet. In addition to downloadable training aids, on-line books, self-paced training and skeleton programs, we can set up your organization with real-time interactive training taught by real instructors. Utilizing Remote Desktop and NetMeeting, you receive the training you need when you want it.

## Ongoing Technical Support

After the course is over, students are welcome to stay in contact with SYS-ED and ask questions via on-line help through the SYS-ED website.

## What Makes a Great Training Center

- ✂ **Cross-Platform Expertise** - Internetworking, web development, E-commerce implementation, client/server, IBM mainframe, ORACLE, and UNIX training and development.
- ✂ **Talented Instructors** - Who are systems, applications, and business solution experts who are certified/authorized in their area of expertise and who know how to communicate with and guide adult learners. Instructors who consistently score "excellent" ratings on student evaluations.
- ✂ **Small Classes** - Our application development courses are never larger than 15 students, frequently as small as 5 students; so everyone receives personalized attention from our instructors. This allows us to invite students to bring design and program "specs" from work to class for analysis and problem resolution.
- ✂ **Comprehensive, Feature-packed Classes** - Presented in a logical, step-by-step format with ample opportunity for practice and reinforcement of what you learned
- ✂ **Hands-on Training** - Each student has his/her own microcomputer and/or 3270 workstation which provides for maximum practice, hands-on simulation and feedback. Computer Assisted Experience (CAE) is an integral element of all SYS-ED courses.
- ✂ **Excellent Courseware** - SYS-ED student workbooks correspond to class lecture, include numerous demonstrations/sample programs, are designed to serve as valuable reference materials back on the job.
- ✂ **E-learning and On-line Books** - We offer the latest in new and emerging interactive technologies. SYS-ED clients will have access to our on-line courseware library and web-based distance-learning services.
- ✂ **Comfortable, Modern Classrooms** - and equipment, and the latest software, to optimize the learning experience.

## We're More than Training

### *For the Fortune 1000, SYS-ED can:*

- ✎ **Integrate** the new and emerging web languages - XHTML, ASP .NET, XML, and 3rd party development tools into web and E-Commerce sites.
- ✎ **Access** and qualify your requirements in terms of foundation programming languages - C, C++, and JAVA for developing client/server, multi-platform, and web-based applications.
- ✎ **Deliver** Internet programming services on platforms such as Visual Basic, .NET, Visual Age, WebSphere, BEA WebLogic, PowerBuilder, and Sybase.
- ✎ **Provide** database design and development services across a wide range of platforms: DB2, ORACLE, SQL Server, Access, FoxPro, and Delphi.
- ✎ **Provide** specialized expertise - application design, program development, and systems programming - on IBM mainframe legacy systems and systems software: MVS, VM, VSAM, CICS, and DB2.
- ✎ **Assist** you with the barrage of requests that flood the Help Desk following the introduction of a new system.
- ✎ **Rent** our well-equipped classrooms for your training sessions if yours are unavailable.
- ✎ **Market** courses to your employees, track class enrollments, and provide management with utilization reports.

### *For Small to Medium Sized Businesses SYS-ED can:*

- ✎ **Evaluate** your software needs, demonstrate and recommend specific hardware/software configurations and help manage the implementation of operating systems and networks.
- ✎ **Deliver** business solutions with off-the-shelf software to help you automate your operations.
- ✎ **Assess** and quantify the role and steps involved in setting up a website to be developed into a E-Commerce business.
- ✎ **Design** and develop database applications.
- ✎ **Provide** programming services.
- ✎ **Plan** transition training and offer cost-effective solutions to learning computer technology (See information on SYS-ED Coupon Book, page 6).
- ✎ **Provide** an action plan for skills training - cross training on a different operating systems, programming languages, and systems software.

### *SYS-ED offers these additional training services:*

- ✎ **Student Course Manuals** are available for site licensing, so you don't need to invest the time and resources to develop your own training program.
- ✎ **Tailored 3 – 6 Week Training Programs** for web developers, entry level programmers, and systems programmers.
- ✎ **Mentoring Training** in short, intense sessions in the privacy of your office or ours.

### National Schedule

Courses and cities are added regularly - Go directly to [www.sysed.com/otherloc.htm](http://www.sysed.com/otherloc.htm).

## Using this Course Calendar with the SYS-ED Website and Search Engine

To receive immediate information on the topics, dates, and price for a course, go to the SYS-ED website at [www.sysed.com](http://www.sysed.com) and access the search engine of the home page. Type in the word/term that you are interested in and click on the Search button. Information can then be printed directly from your computer screen.

There are several ways to locate a course and obtain information specific to your training needs and operational objectives.

***Get on the Fast-track!***

Here are some suggestions.

1. Search by software title.
  - Type in CICS or DB2 or VSAM and click on the Search pushbutton; a variety of course levels will be listed.
  - Type in JAVA and click on the Search pushbutton; a variety of platforms and course levels will be listed.
  - Type in .NET and click on the Search pushbutton; a variety of platforms and course levels will be listed.
2. Search by category.
  - Type in Programming Languages and click on the Search pushbutton, there will be a list of programming language courses. Many of these courses will offer multiple levels of expertise.
  - Type in Programming Skills and click on the Search pushbutton, there will be a list of courses including z/OS JCL, TSO/ISPF, z/VM CMS, z/VSE JCL, etc.
  - Type in Utilities & Development Tools and click on the Search pushbutton, there will be a list including Xpediter, File-AID, DYI-280, etc.
  - Type in Visual Basic, PowerBuilder, or Sybase and there will be a list of courses for each of the systems software products.
3. Browsing through a schedule.
  - Type in the schedule name: Microsoft Systems, Client/Server & Internet Programming, IBM E-Commerce & Programming, Web Development & Programming, OS/390 and z/OS - Mainframe, DB2 UDB, ORACLE, UNIX, or Evening/Weekend.
4. Keywords can be used to locate courses and other information.
  - Type in IBM, Microsoft, ORACLE, Lotus, etc. All the courses for that particular vendor will be listed.
  - Typing in discounts will provide the discount options which are available

If you have trouble finding a course, information can be requested via e-mail or by telephone. Comprehensive course outlines, lesson plans, and skills/needs assessments can be arranged by appointment with a SYS-ED training consultant.

## Students Give SYS-ED High Marks

*"I've taken similar courses at two other training facilities and have never come away with any useable information. The courses were always too basic. Yours, thankfully, was very informative, kept my attention and interest, and all the topics were useful."*

*"Instructor had excellent knowledge of subject matter. Did one-on-one help with students who had problems during lunch break and after class. Made a very complex package easy to become competent in. Easily the best instructor I've had."*

*"As usual. SYS-ED has brought me closer to the level of expertise needed to perform my job. Thank you."*

*"My instructor presented in a very relaxed, easy manner. Her projection was excellent and this was a very worthwhile class."*

*"With SYS-ED's help, our small data processing department has not had to worry about training on the packaged software. Instead, the time is there to devote to getting the new system up and running. Thank you for all your help."*

*"Instructor was superb! Calm, patient, clear presentation...very knowledgeable."*

*"My instructor was delightful and professional--able to explain concepts in more than one way, a boon to understanding."*

## Testimonials

### Building a Reputation One Course at a Time!

The list of satisfied clients keeps on growing and reflects courses conducted within the past few weeks and months. Testimonials can be viewed by typing "references" or "show me", from any search field via the SYS-ED website - [www.sysed.com](http://www.sysed.com).

## Bring Our Courses to You!

### Private Courses

We can also provide a custom program combining elements of both private and open enrollment training options. Contact our New York office for a quotation.

- Attendees who have not mastered the subject matter may repeat the course free of charge through our open enrollment schedule.
- Organizations, which use SYS-ED for a private course, have the right to send new hires to that course through our open enrollment schedule at a special fee.
- Organizations, which use SYS-ED for a private course, are entitled to 3 months use of our e-learning library free of charge!

## Discounts

### Multiple Student Discounts

Send 2 people to the same course and receive a 5% discount, 3 people a 10% discount, 4 people a 15% discount.

### Coupon Books

Realize savings of up to 32% by pre-purchasing SYS-ED's Coupon Books. Your firm only gets billed once, cutting down on paperwork and approval time.

### Premium Client Discounts

Organizations that have used SYS-ED previously for a private course will be given preference on discounted training weeks (10 to 25% discount lower than our standard fee) as they become available.

*SYS-ED courses are not intended for or open to the general public. They are intended for employees of Fortune 1000 companies, government municipalities, consulting companies, software companies, healthcare facilities and mid-sized businesses.*
